

DESIGN IS PERSPECTIVE

STANDING

on a city block, looking up at Bilbao, Spain. Immersed in angles new and old, a confluence of present and past unfold.

Layers of light and shadow disperse through the buildings, altering perspective. A vaulted cathedral reflects on the glass of an ultramodern facade, creating a character revival. Contradiction lives here, shaping its own architecture, its own sense of time. And place.

STRUCTURE STUDY

of depth, form and complexity

Our designers studied, sketched and photographed the buildings of Bilbao from different angles. An exploration of color, the palette was inspired by the rich velvet patina of the opera house juxtaposed with sleek steel and glass of the modern buildings. They accentuated shapes and layered these with photography to define the space in their own perspective. With a window light source, they experimented with acetate transparencies, layering and manipulating the sheets to form Composite.

LIGHT TRAVELS

through the streets and across a courtyard. Shadows shift.
Materials merge. Colors collide. In that decisive moment,
DESIGN IS PERSPECTIVE.
